| While checking the Heights area I was turning onto the above road from True Vista Circle (north end) I observed three white males heading north on the above street. I made a u-turn and contacted the individuals. They stated that they were out for a walk and were talking. They further stated that they had just been contacted by EPSO and were heading to one of the individual's uncle's house on Piney Hill Point. The individuals were all over 18. I observed them as they left and entered a home on Piney Hill Point. Code 4. KS |             |                     |            |                     |                             |

| <p>RP, PID 5030 called and stated that the house behind hers had a dog on the back deck that was wining and trying to get inside and said that this was not normal. She also said she heard the residents were moving and was afraid they moved and left the dog behind. I advised her that I would respond and if it looked like the dog was abandoned I would contact the Humane Society. She seemed upset about them being called and said her and her son would check on the dog latter in the day. I responded and did not see or hear any dogs and there was a vehicle in the driveway. Information passed onto WPS to monitor. CF</p> |             |                           |            |                     |                             |

| <p>A neighbor of the above address stopped by the WIA office and told them that the screen door to the above address was damaged and the resident was out of town. I responded and found the screen door was partially open and you could see that the door framing is bent. The door has been this way for at least a few days due to the fact that a bird has built a nest on top of the door. The front door was locked and looking thru a window it did not look like anything had been disturbed. I called the homeowner with the phone number the neighbor provided and left a message about what I had found. | RP at the above address states a white dog with brown ears is running loose in the area. I responded and could not locate the dog. The RP called back appx 30 minutes later and said he has the dog and the dog belongs to an employee at the golf course. I advised him that we cannot pick up dogs and he should call the golf course or the Humane Society. I also told him the Humane Society would be the best option as we have no enforcement action against an employee at the club. PID 5031 then called and said the original RP now has the dog tied up and she called the country club to have the dog picked up.   |             |                           |            |                     |                          |

| While on patrol I observed VID 2428 being loaded onto a flatbed tow truck (Tri-Lakes Towing) at the intersection of the Cloverleaf and Walters Point. I asked the driver what happened and he stated that he "forgot the turn in the road". The vehicle slid off the road hitting and knocking over the street sign. I advised the driver that since there was property damage he would have to file a cold report with CSP. The driver said he would have to pay for the damage because he didn't have collision coverage. The driver refused to identify himself. I notified CSP and they stated that if the driver did not file a cold report there wasn't anything they could do and did not have a trooper available. I advised County Roads of the damage to the sign and the vehicle information. KS |             |                           |            |                     |                          |

| While checking the above location, I found VID 2435 unoccupied but the trunk open with golf clubs and other valuables in the trunk. There was an event at the location, so I contacted an official and had them send the owner to check the vehicle. The owner checked the vehicle and nothing appeared amiss and he secured the trunk.  |             |                             |            |                     |                     |

| RP reports a disturbance (yelling and screaming) from the above address. I responded and staged and I couldn't any noise or yelling. As I was departing, a resident from the above address contacted me and apologized if they were making too much noise while playing a game (bean bag toss game) earlier. They had already put the game away and were preparing to go inside. | RP states she met a man a week ago and he is now stalking her. She has reported it to EPSO but has not filed a restraining order yet. PID 5046 is described as appx 60yrs old, thinning brown/reddish hair, avg build, appx 5'8" and 175lbs. He also drives VID 2436 and 2437. I advised her we would conduct drive by checks once per shift until further notice. She will also let us know if she gets a restraining order served.   |             |                             |            |                     |                     |

| RP states that she found 2 screens damaged in window wells on the north side of the home. I responded and found 2 bent window screen frames still intact in the tracts. The RP states it probably occurred since the holidays but not sure. It is unknown if someone tried gaining entry.  |             |                             |            |                     |                     |
