During shift change, 5W49 and myself observed two parties walk from VID 3155, parked on the North side of the parking lot, to the townhomes. One party returned to the vehicle. A few moments later they walked from the vehicle behind the garage with a flashlight. 5W49, 5W47, and myself searched the area for the party and were UTL. We checked the vehicle and observed the dash in pieces, the steering column broken, and a screwdriver and locking pliers on the center seat. Due to the observation we contacted EPSO. EPSO and Monument responded and found the vehicle had been ran several times in the last 24 hours, but nothing showing it as being stolen. Due to the vehicle not having valid registration, and being parked in two parking spaces, I left a parking violation notice on the driver side window. Code 4. BWC available from 5W47 and myself.
