RP reports barking dogs at the above address. Upon arrival I staged in the area and could hear dogs barking in the distance but wasn't able to determine if they were from the above address. I got out and stood by a tree in front of the building. I heard the dog bark once. A short time later the dog barked as a woman and her dog walked in front of the building. The barking did not rise to the level of nuisance barking. At that time, the RP approached me and I explained our procedure for handling barking dog calls. During our conversation (where she would have been visible to the dogs) they never barked. Complaint is unfounded at this time. BWC Used.

RP reports "the same kids from the other times this week" fishing at Lake Woodmoor on the northeast side by the rocks at the cul-de-sac area of Lower Lake Road. Upon arrival I contacted two juvenile males and made them release the fish they had just caught and told them to come up to me. As they were coming to the top of the rocks I told them to come over to me. They continued to walk and ignored me and said "We're leaving". One did state he was from "out of state". I advised them they would be charged with criminal trespass if they came back. They started walking away so I slowly followed them to see where they were going. Finally, they approached a car so I got out and we had a cordial conversation. I advised them why I was contacting them and why they couldn't fish in the lake. They informed me that they were told they could fish in the lake. After our conversation, they left the area. Neither would not identify themselves. BWC used.
